NEW PUBLICATIONS

The *Journal* seeks to cover, in its monthly bibliography, all current literature of economic interest in the following fields:

- I. Books published in the English, French, German, and Italian languages.
- II. The government publications of the United States and of Great Britain.
- III. Periodical references of four or more pages appearing in the periodicals listed below. Additions will be made to this list from month to month and when added each periodical will be indexed from January 1, 1908. Periodicals devoting an entire number to a single discussion are listed under books.

In addition to these fields, a considerable amount of fugitive material is covered. This includes such items as state and municipal publications, foreign government publications (other than those of Great Britain), reports and pamphlets of various organizations, etc. Facilities which would make possible a complete index of this material do not exist. The *Journal* has made a beginning, however, and progress is hoped for. Mr. Charles Harvey Brown of the John Crerar library has contributed many of the titles in this elusive field.

In the current number the periodical index covers only issues since January 1, 1908.
